

<b>Informatica (L) - Titolo delle relazioni finali a.a. 2020/21 (F008)</b>
ANTIMONY: an approach to integrate anomaly detection into MQTT environments
Un sistema per il recovery sicuro di IoT device dopo un attacco malware
Tankerino, AI lawnmower
Deep Learning to denoise scanned documents
A Food Recommendation System for Reducing The Water Footprint
Business Logic Updates in Android Applications: Analysis and Development of an Automatic Solution
An empirical investigation of software understandability and its relationship with source code properties
Modeling and computing the cost of binary classifier-driven quality assurance
Faking Voices: style transfer for multilanguage audio files
Descrizione composizionale di sistemi discreti biologici usando l'algebra cospan/span(graph)
Information Extraction for medical examination data using Deep Neural Networks
Dialogue intents detection in unlabeled short texts
Crop Image Recognition With Feature Pyramid Network integrated with Attention Mechanism
Uno studio approfondito sui sistemi di raccomandazione e una panoramica della loro crescente importanza nell'e-commerce
Efficient virtual assistants improvements leveraging positive and negative feedback
Risks, Threats, Attacks. The Cybersecurity approach to proactive and reactive techniques
