

# Animal and Cell Models in Life Sciences Research

Seminars:

---

**8 February**

*from 14:00 to 17:00 Room 9 MTG*

---

## CANCER MODELS IN PRECLINICAL RESEARCH

**Prof. Sandra Perez Torres** Researcher at CIBER ehd and Assistant professor at University of Barcelona-Visiting Professor at Insubria University

**“DO FISH HAVE NOSE? COVID, infections, pollutants, and other horror stories”.**

**Professor Mar Huertas** Associate Professor Texas State University  
Visiting Professor /Visiting Scientist at Insubria University

Organizer: Elena Bossi

---

**13 February**

*11:00 Room 1MTG*

---

## Fluorescence microscopy methods in preclinical and clinical models

**Dr. Roberto Ferrarese**- Senior scientist- Department of Neurosurgery University Medical Center Freiburg  
Freiburg Visiting Scientist at the University of Insubria

Organizer: Greta Forlani

*These are the first three seminars of didactic activity for the Ph.D. program in Experimental and Translational Medicine. The complete program for “Animal Models and Alternative Methods in Biomedical Research” organized by Cristina Giaroni will be available shortly. This course is compulsory for all Ph.D. students who intend to apply for 'Formazione' in order to obtain authorization to work with animals.*
