

ENTer

The current role of molecular biology, immunotherapy and new technology in the management of **E**ar, **N**ose and **T**hroat pathologies

ORGANIZERS:

Prof. Paolo Battaglia – Prof. Mario Turri Zanoni

10 hours (1,25 CFU)

January 30th 2025 – from 16.00 to 18.00

Immunotherapy in ENT malignancies: a biological based solution for aggressive diseases

Prof. Paolo Bossi, Humanitas University, Milan

February 26th 2025 – from 17.00 to 19.00

Artificial intelligence in ENT: how to adapt to this new era

Dott. Alberto Paderno, Humanitas University, Milan

March 17th 2025 – from 16.00 to 18.00

Nasal pathologies in systemic disease: from a correct immunohistochemical diagnosis to a biological based treatment

Prof. Mario Turri Zanoni, University of Insubria

April 24th 2025 – from 13.00 to 15.00

From lab to clinic: the game-changing influence of biotechnology in ENT

Prof. Paolo Battaglia, University of Insubria

May 13th 2025 – from 16.00 to 18.00

Biological therapies in chronic rhinosinusitis: a new frontier to treat an inflammatory disease

Prof. Carlotta Pipolo, University of Milan

*The classes take place online on Teams platform
The links for participation to the seminars can be obtained clicking on the seminar title*
