eua EUROPEAN UNIVERSITY ASSOCIATION

EUA Strategic Plan

June 2026

Introduction

In 2020, EUA published its first Strategic Plan, Europe's Universities Shaping the Future, outlining the goals, values and principles of the Association. The following year, EUA developed Universities without walls – A vision for 2030 with the aim of guiding and supporting universities in their own strategic development. Since then, universities have experienced dramatic change and their capacity to withstand external pressures has been continuously tested.

The 2030 vision for universities without walls remains a point of reference for the university community. Yet, as universities face new and unpredictable realities, EUA must adapt along with the evolving needs and priorities of its membership, reasserting itself as the voice of Europe's universities.

EUA's Strategic Plan articulates the Association's identity, its guiding commitments and its priority actions. It sets out how the Association works to support its members in realising their individual missions.

The Plan is published during a time of mounting geopolitical tensions and democratic erosion, compounded by heightened security concerns, economic uncertainty and growing civil unrest. It therefore emphasises the essential role of universities in fostering societal cohesion and development and reaffirms EUA's responsibility in enabling this – both as a platform for peer exchange and as a strong advocate for Europe's universities.

EUA's 25-year history has been shaped by its members; its future will continue to be guided by an enduring mission to support them in excelling in service to society.

Our vision

Strong universities for Europe

Our mission

Supporting our members to excel in service to society

Introduction

In 2020, EUA published its first Strategic Plan, Europe's Universities Shaping the Future, outlining the goals, values and principles of the Association. The following year, EUA developed Universities without walls – A vision for 2030 with the aim of guiding and supporting universities in their own strategic development. Since then, universities have experienced dramatic change and their capacity to withstand external pressures has been continuously tested.

The 2030 vision for universities without walls remains a point of reference for the university community. Yet, as universities face new and unpredictable realities, EUA must adapt along with the evolving needs and priorities of its membership, reasserting itself as the voice of Europe's universities.

EUA's Strategic Plan articulates the Association's identity, its guiding commitments and its priority actions. It sets out how the Association works to support its members in realising their individual missions.

The Plan is published during a time of mounting geopolitical tensions and democratic erosion, compounded by heightened security concerns, economic uncertainty and growing civil unrest. It therefore emphasises the essential role of universities in fostering societal cohesion and development and reaffirms EUA's responsibility in enabling this – both as a platform for peer exchange and as a strong advocate for Europe's universities.

EUA's 25-year history has been shaped by its members; its future will continue to be guided by an enduring mission to support them in excelling in service to society.

Mission Statement

Mission Statement

Mission Statement

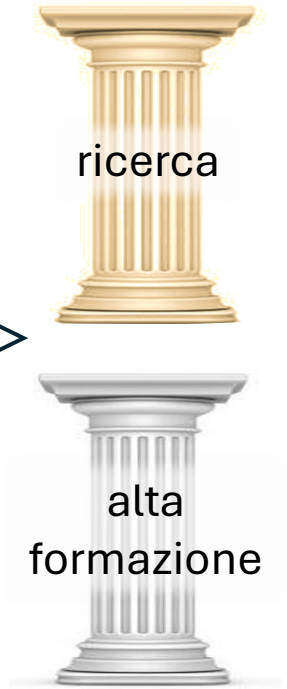

The mission of MIT is to advance knowledge and educate students in science, technology, and other areas of scholarship that will best serve the nation and the world in the 21st century.

MIT's motto is "mens et manus," or "mind and hand," signifying the fusion of academic knowledge with practical purpose.

definizioni | missioni tradizionali (1° e 2°) | 3° missione

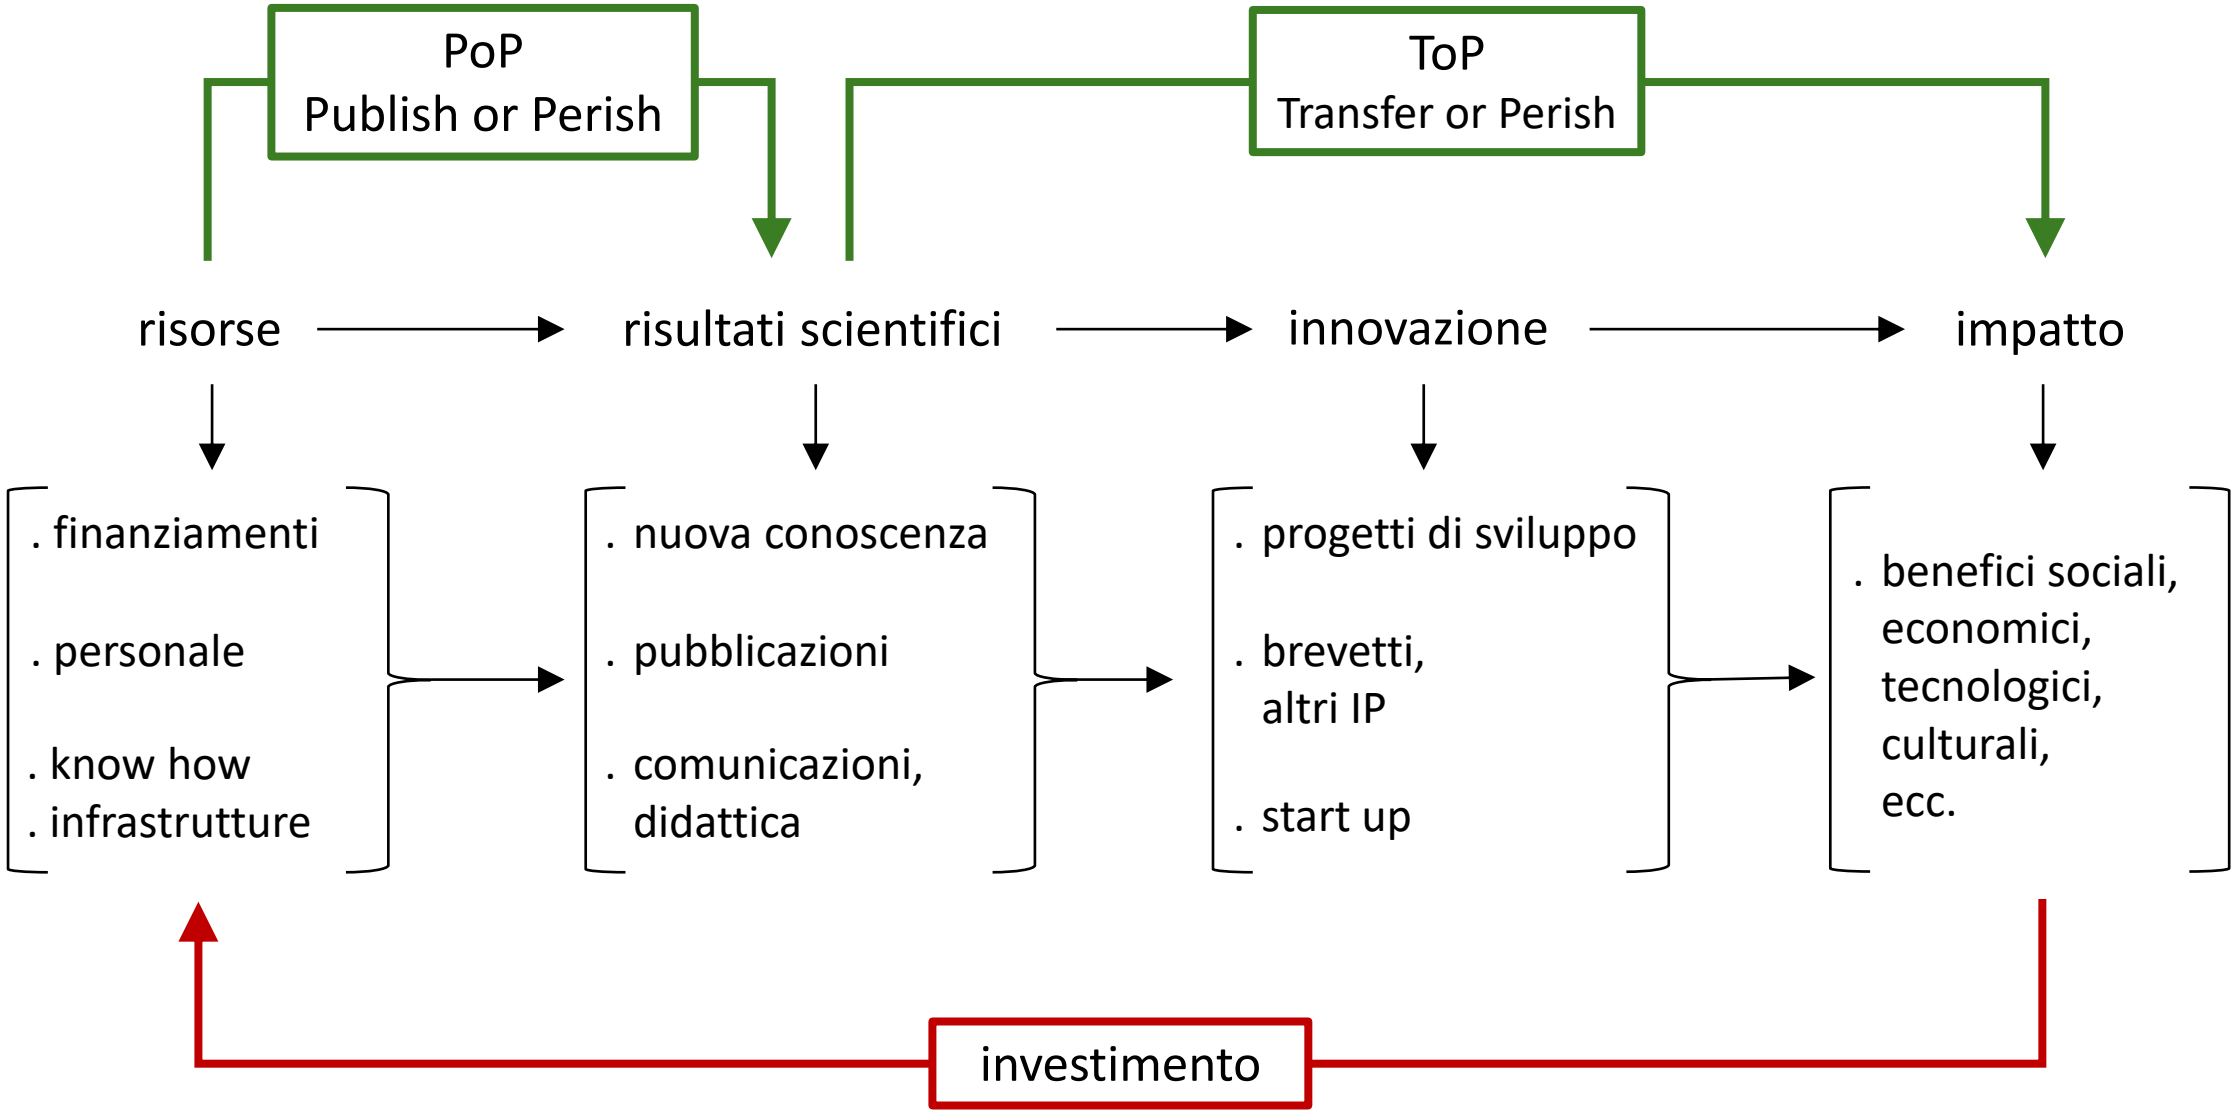

nuove definizioni	azioni-attività-strumenti	missione
stakeholder	studenti e comunità scientifica	società
valori	autonomia	responsabilità

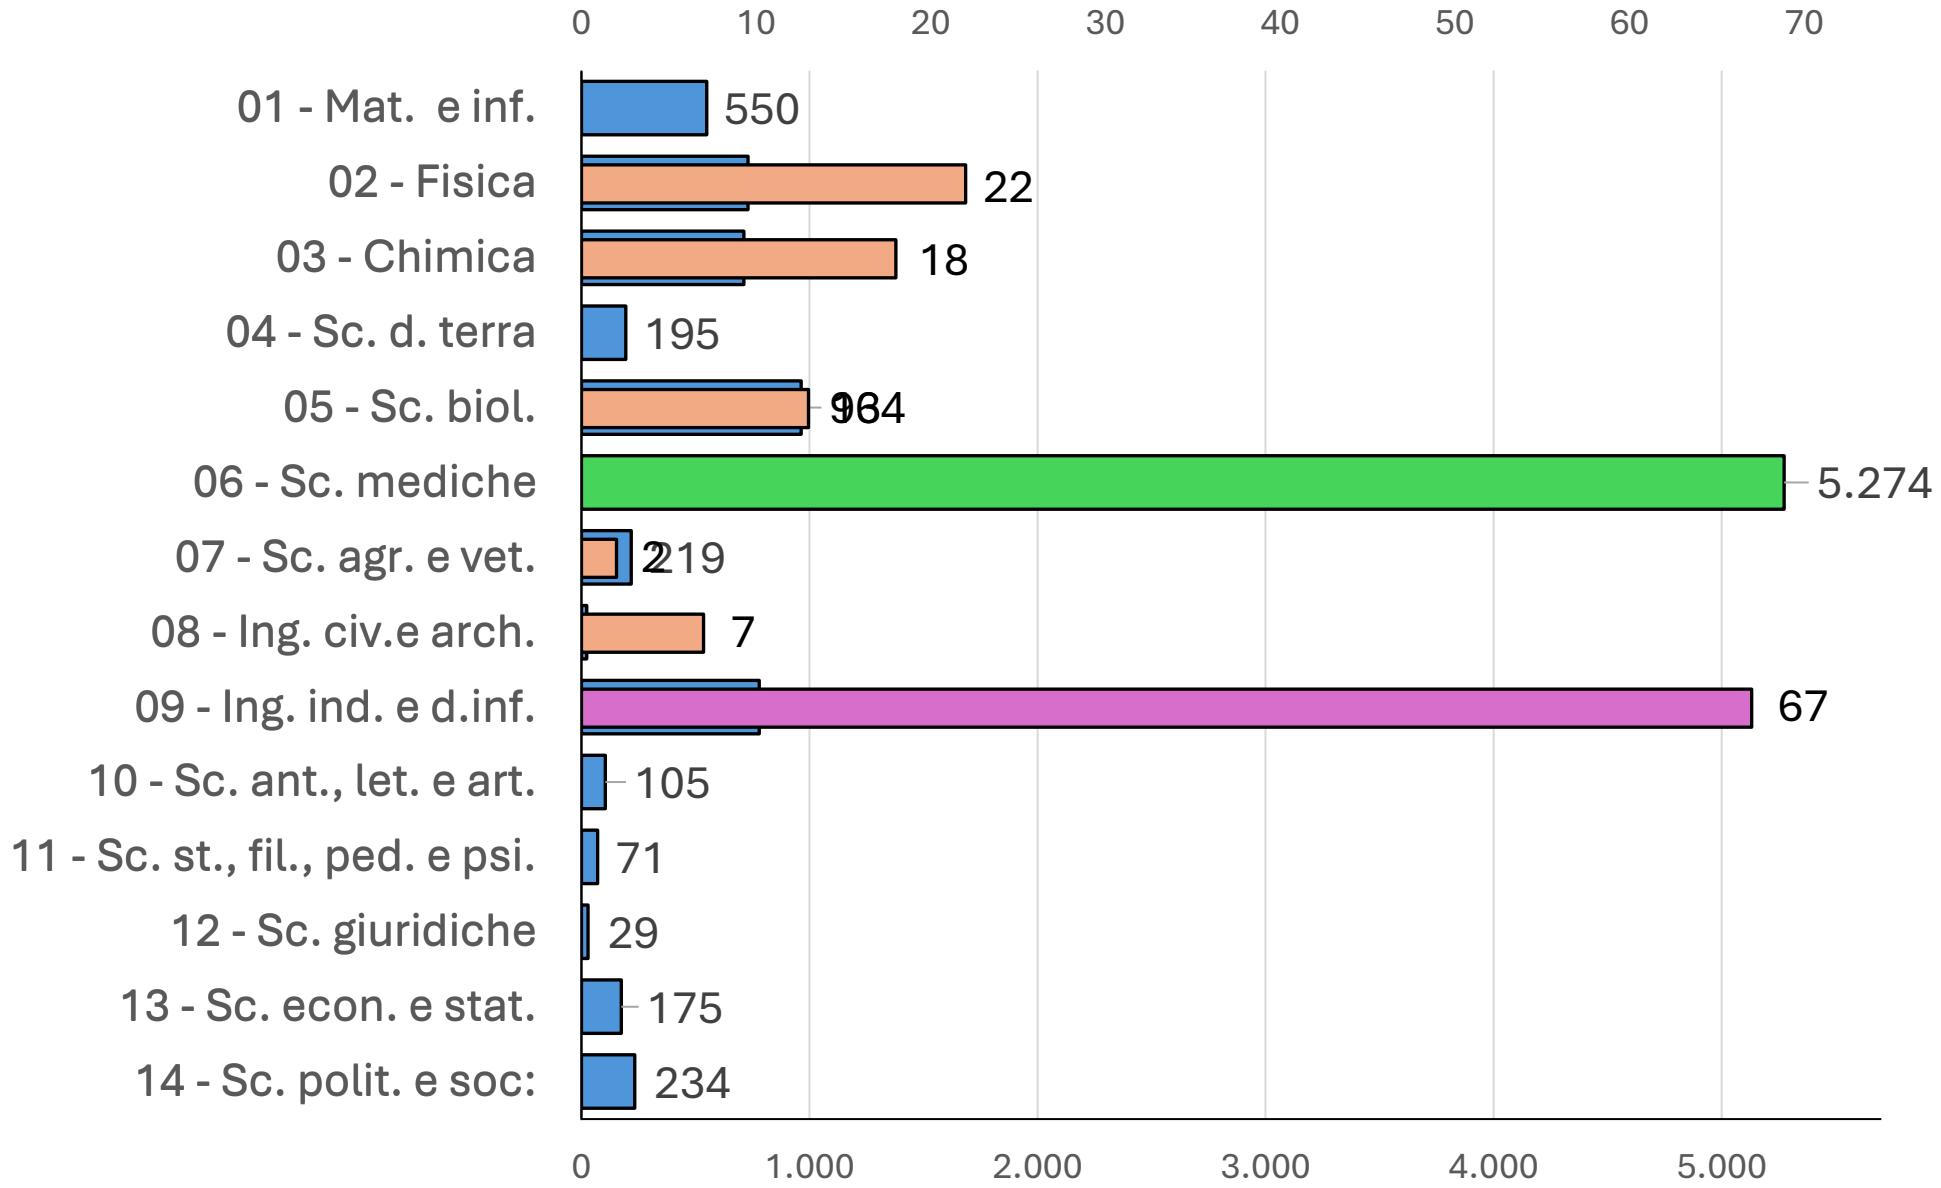

la catena del valore

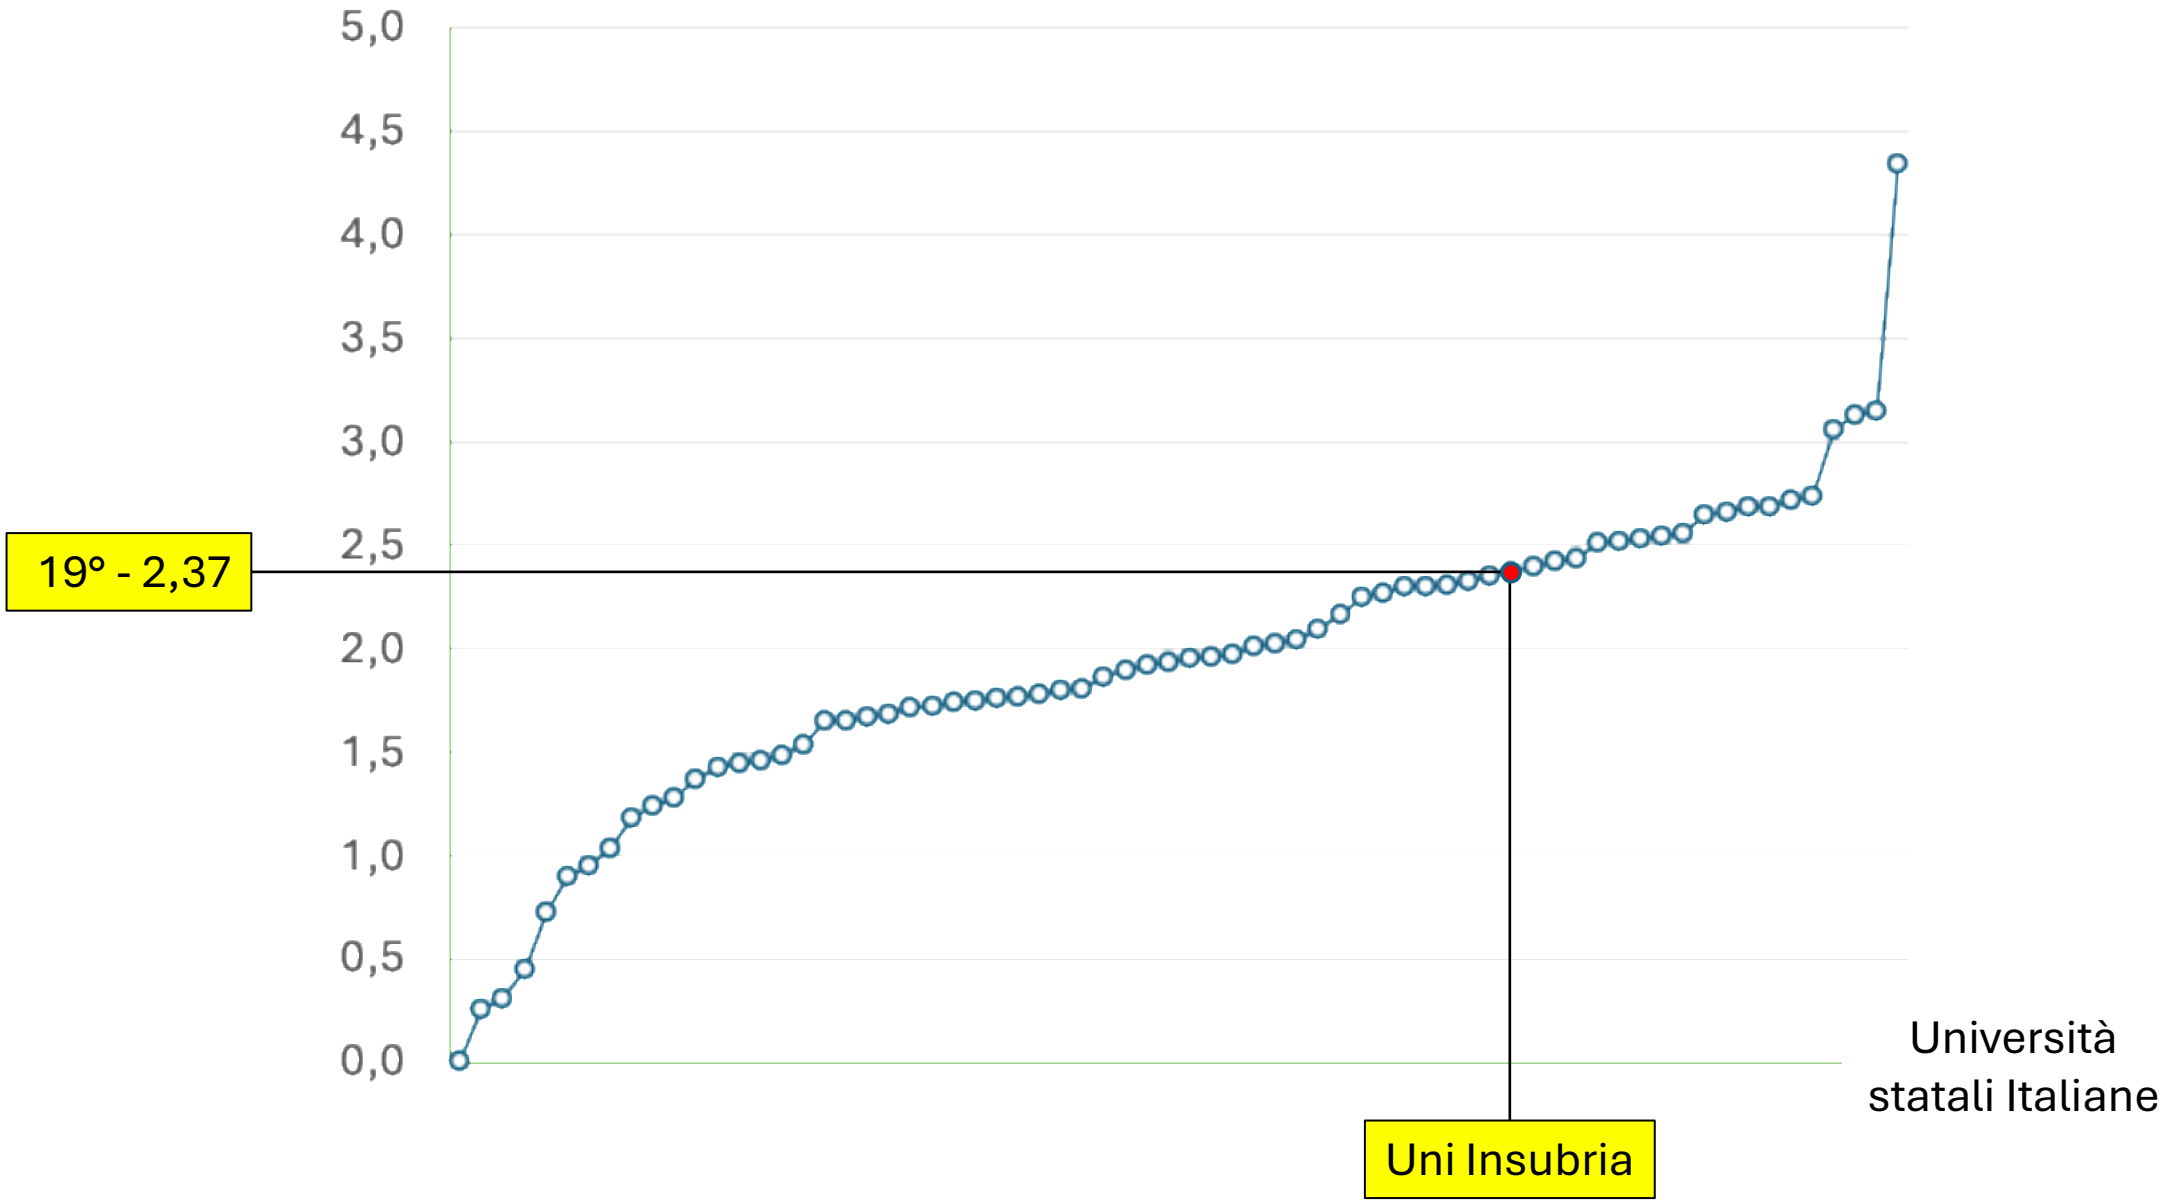

Uni Insubria

pubblicazioni 2020-2024 per area CUN - tot 10.060

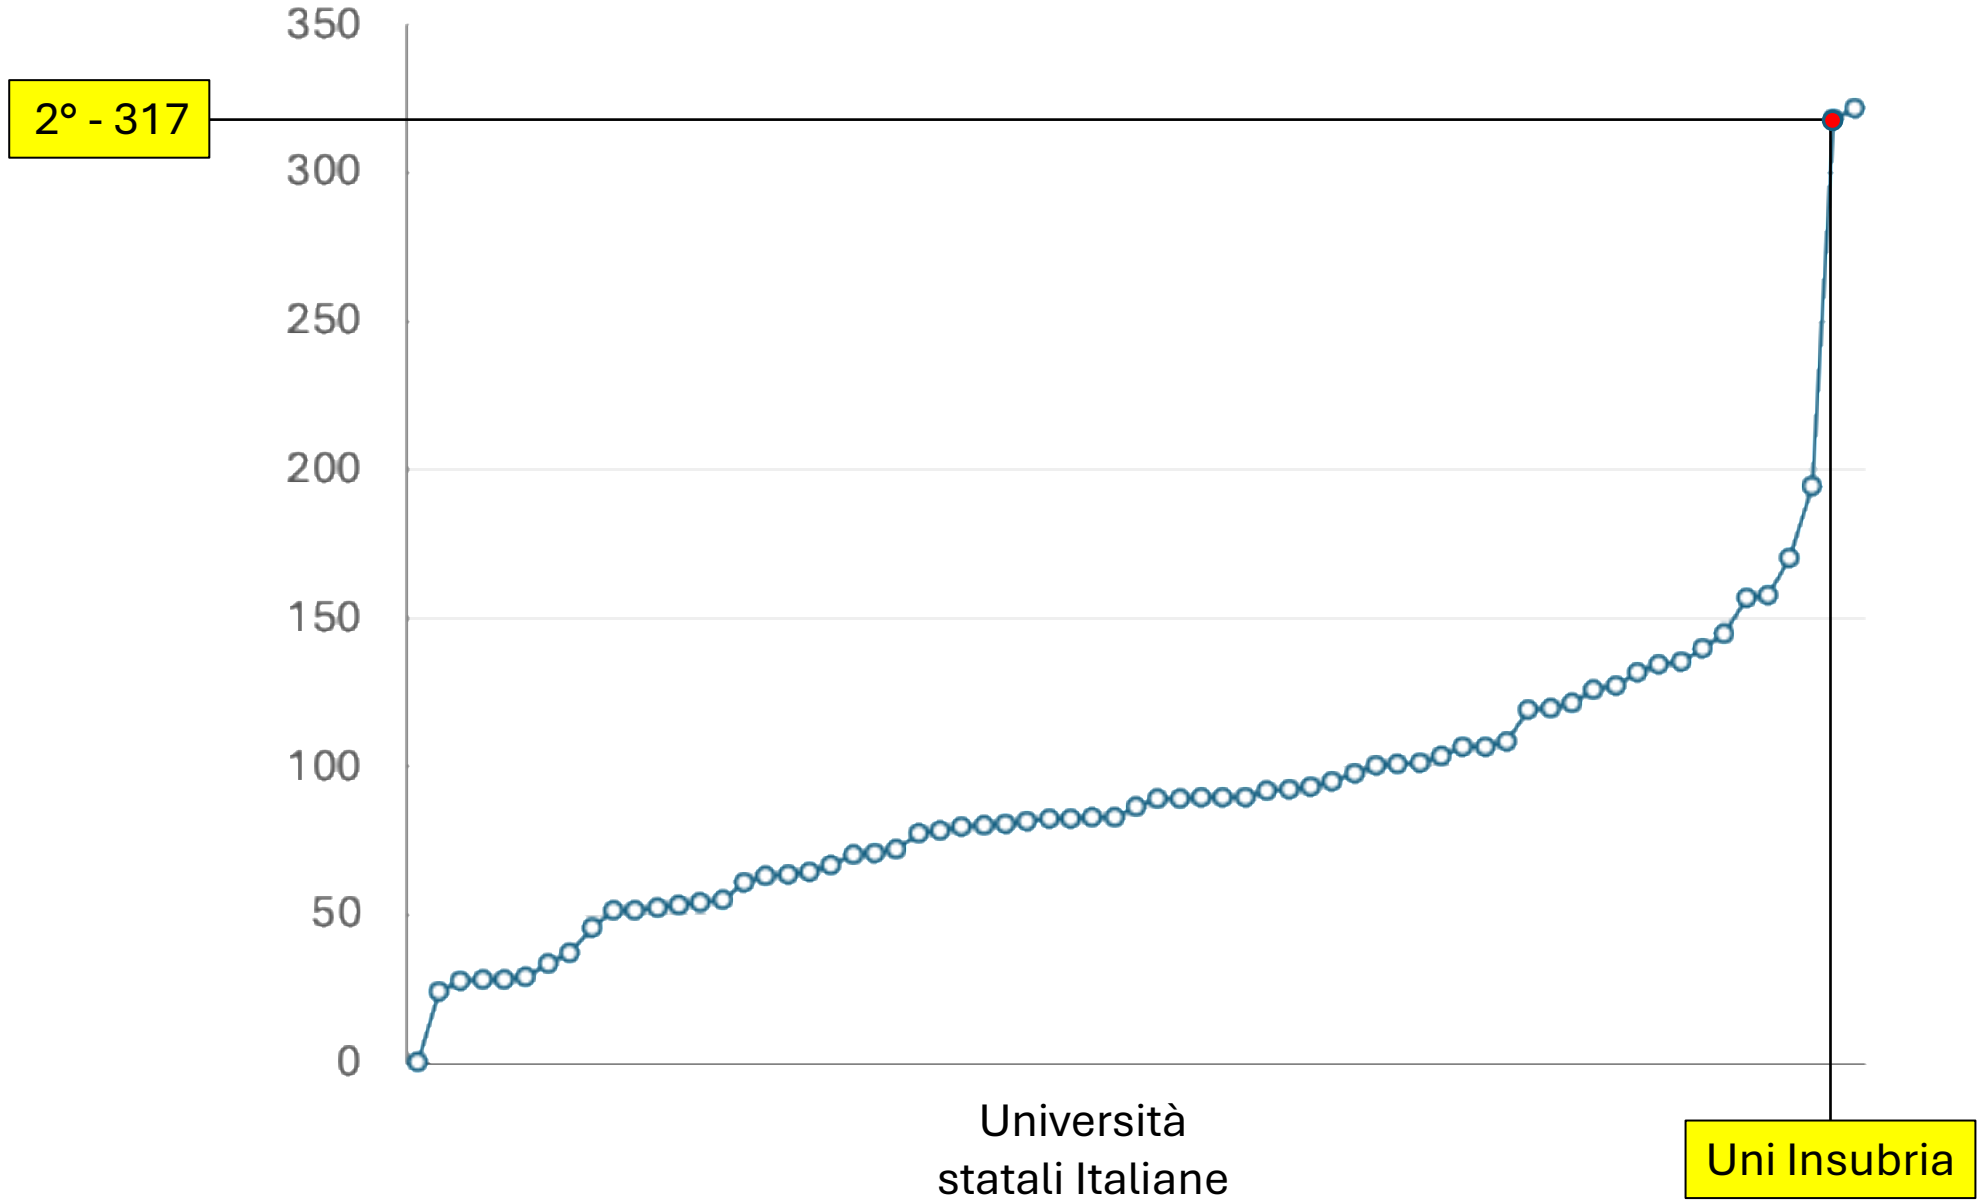

brevetti 2020-2024 per area CUN - tot 129

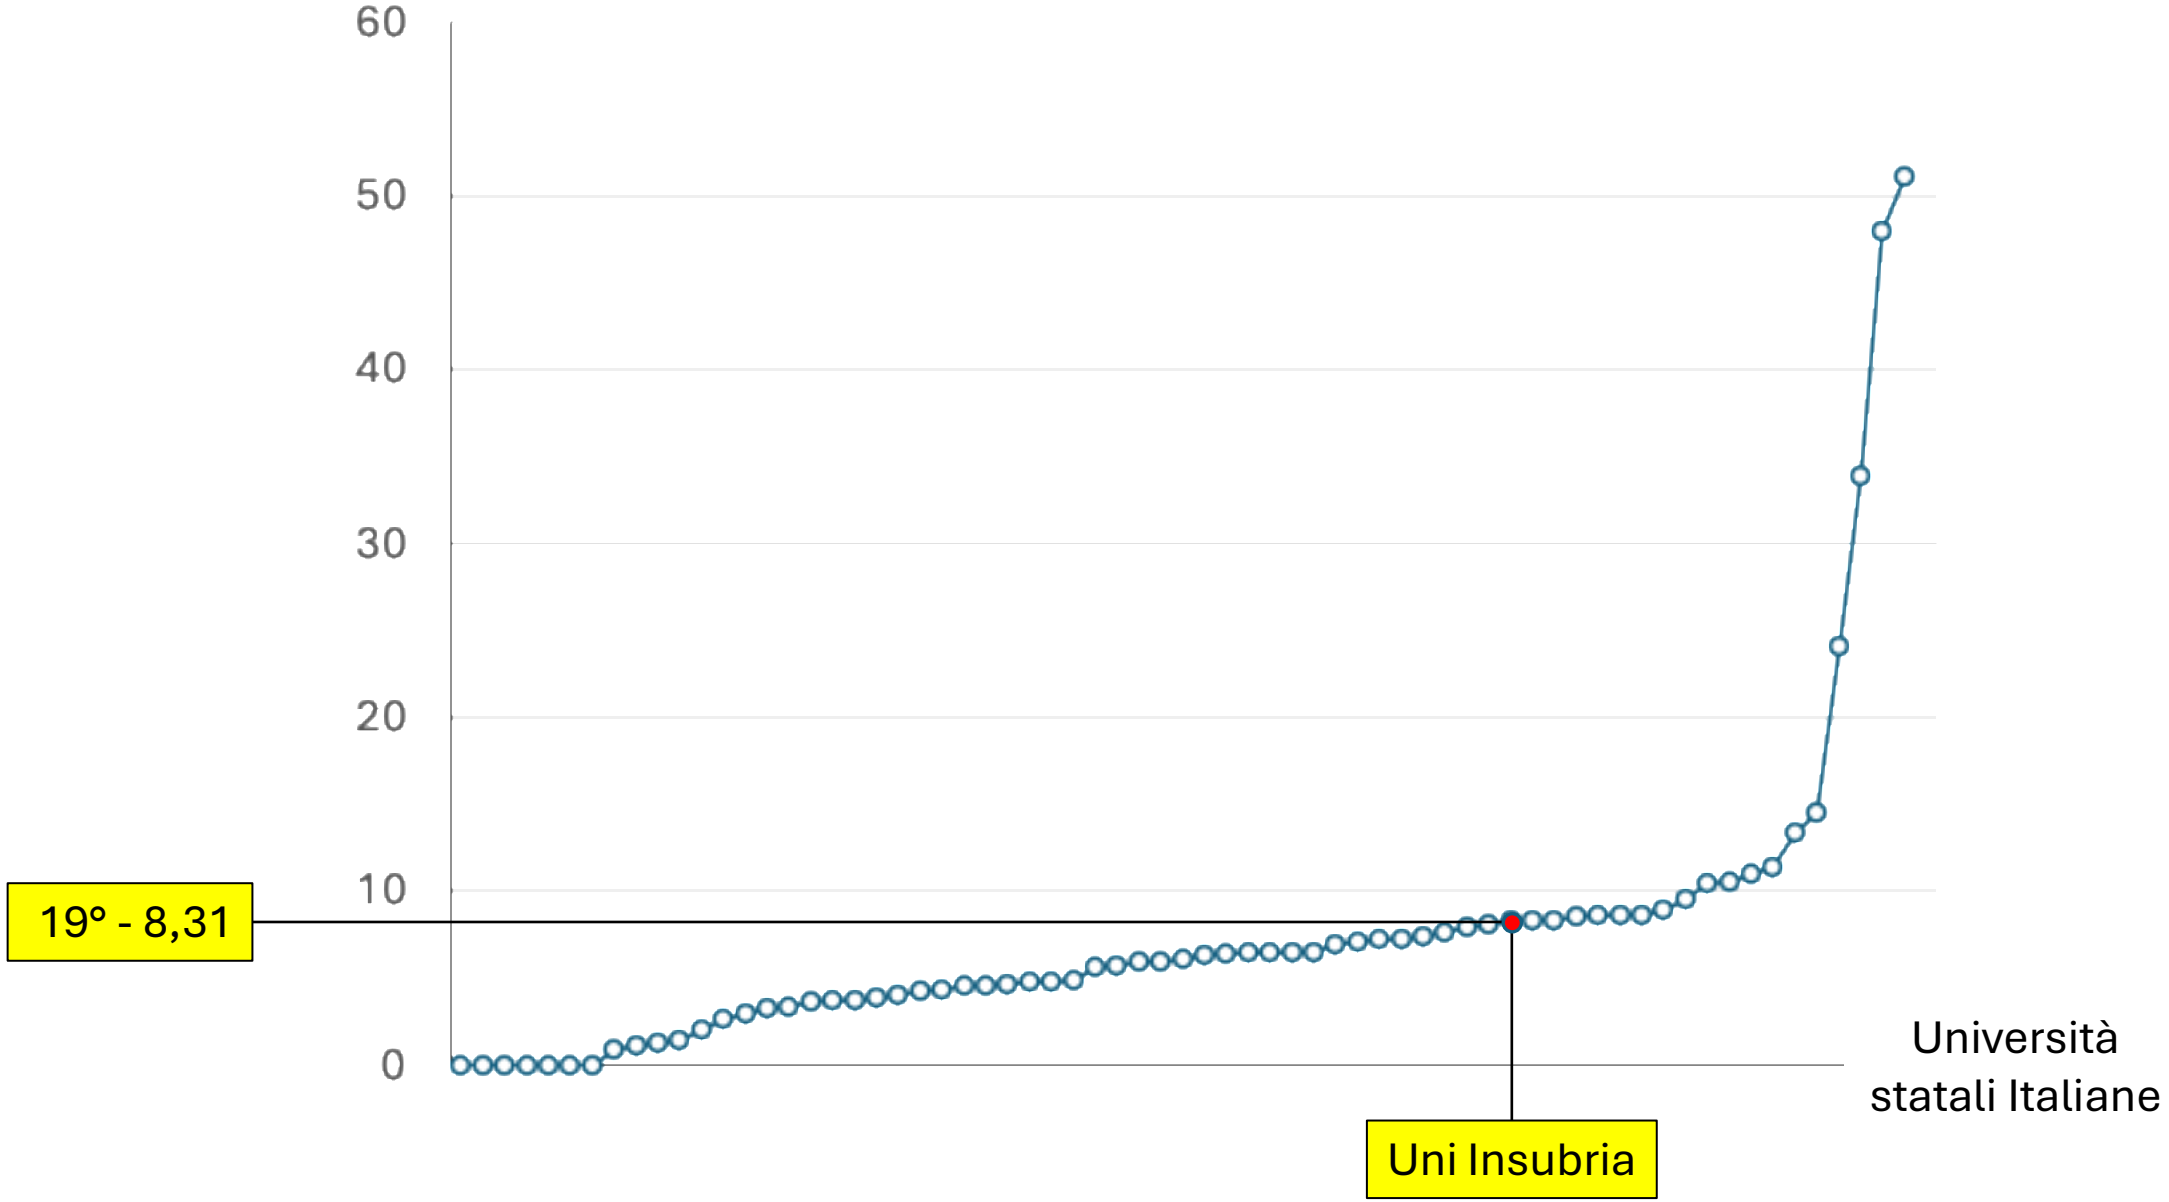

n. pubbl. (media 2020-24) / doc (2024)

n. pubbl. (media 2020-24) / 1 M€ ricerca (2024)

n. brevetti (media 2020-24) / 1.000 pubbl. (media 2020-24)

Considerazioni sulla proprietà industriale e intellettuale generata nelle università statali (**brevetti**, modelli di utilità, nuove varietà vegetali, marchi, disegni e modelli, topografie dei prodotti a semiconduttori, diritto d'autore)

1. dal 2023 alle università italiane spettano i diritti patrimoniali derivanti da un'invenzione brevettabile

2. tali diritti autorizzano a escludere quindi per una università devono essere trasferiti

3. per ottenere un brevetto una invenzione deve essere nuova e originale, ecc

4. in genere lo sviluppo di un prodotto o servizio basato su una invenzione che deriva da risultati della ricerca è molto più costoso e rischioso della ricerca stessa

Qual è il ruolo del ricercatore nei processi di valorizzazione?

1. capire se i risultati della ricerca possono suggerire la soluzione di un problema tecnico (invenzione)

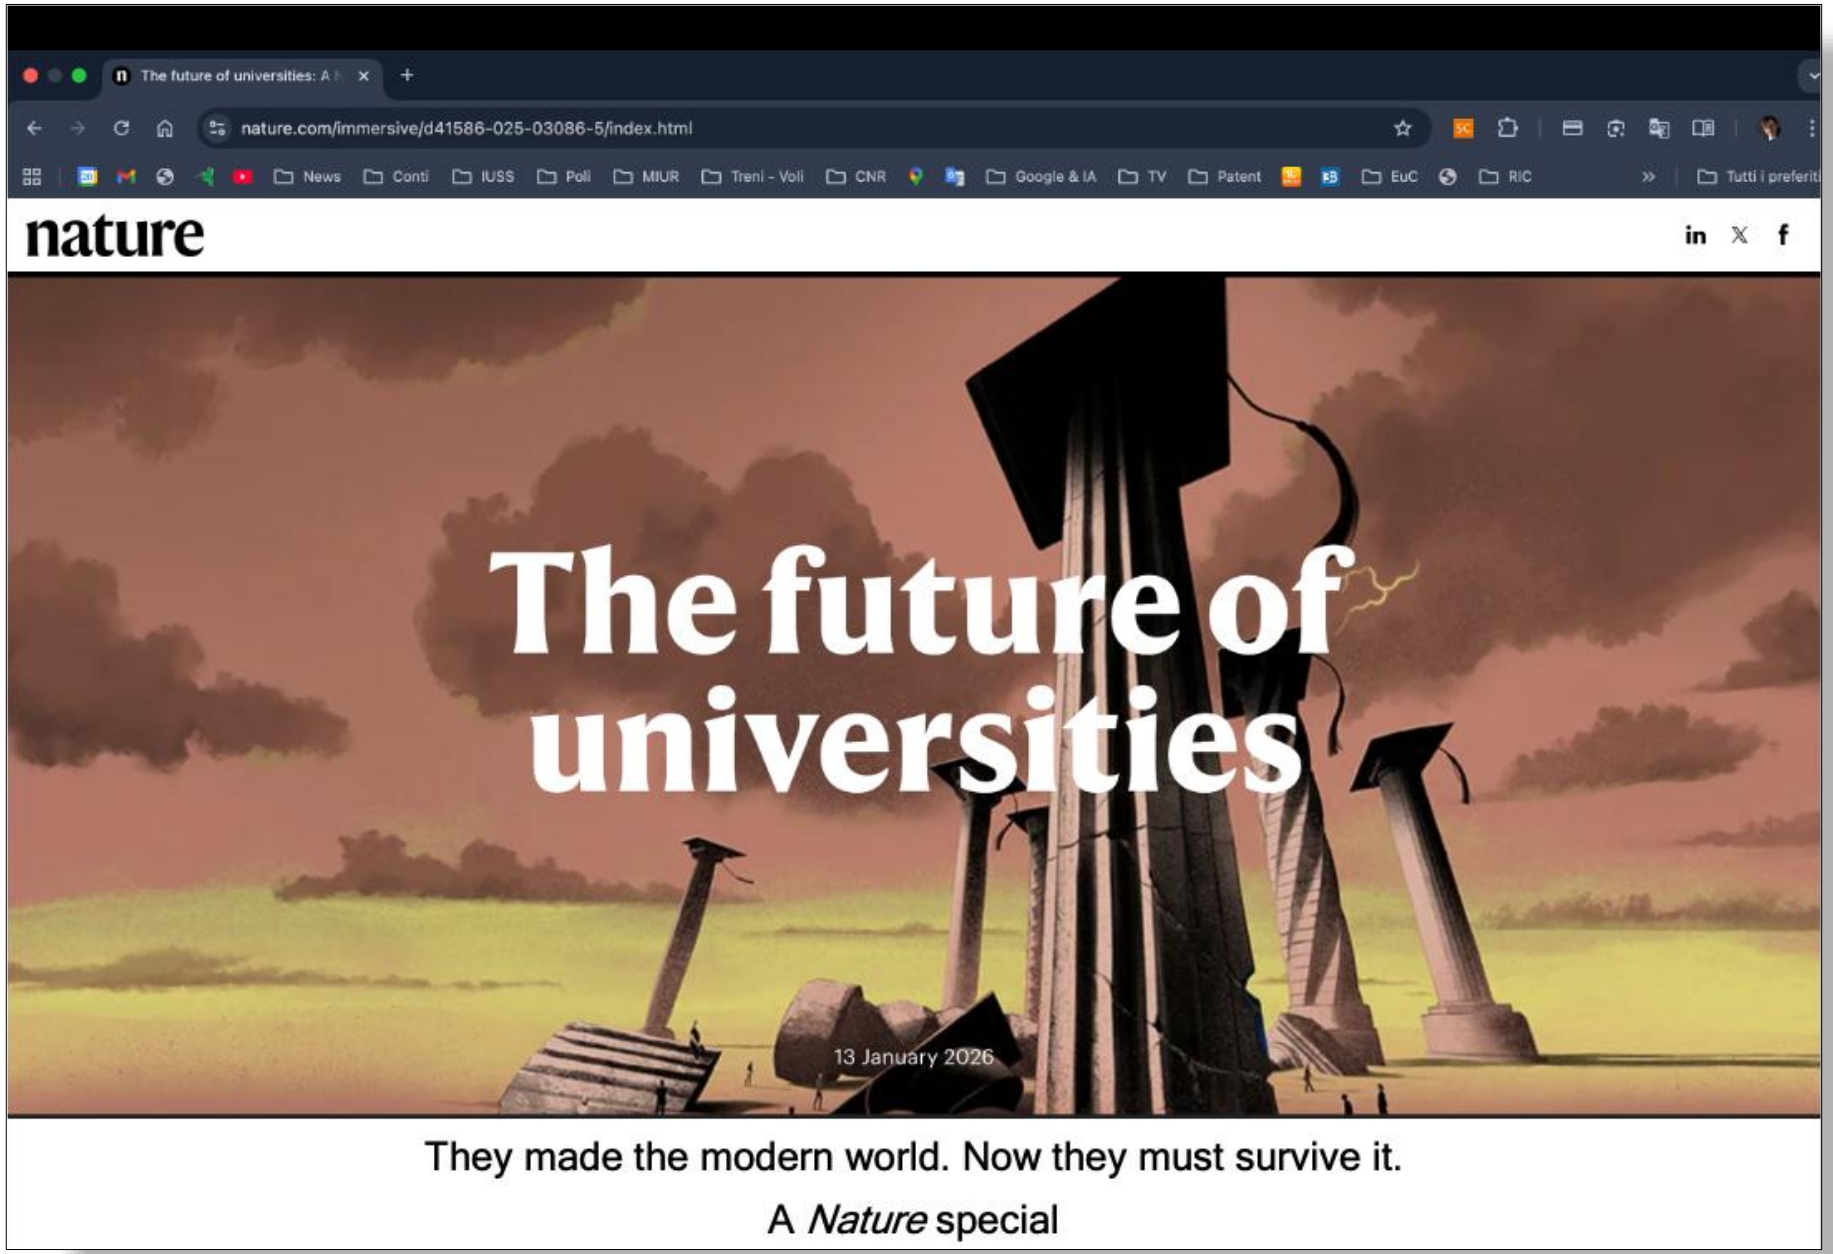

se si:

2. mantenere segreta tale soluzione e attendere a pubblicare o comunicare gli elementi che la caratterizzano

3. informare la struttura di Ateneo preposta alla gestione dei processi di valorizzazione

4. collaborare con la struttura di Ateneo per gestire il processo di protezione di successiva valorizzazione

5. in genere porre estrema attenzione alle clausole contrattuali sia nella ricerca commissionata che nei NDA
